cipher, the intended recipient knows the key, and so it is also easy for them to decipher the original mes- sage. Give each pupil a copy of the Caesar Wheel Template, and they need to cut it out, and fasten the two wheels together using a clip. It works by matching "a" on the inner wheel to the appropriate shi le e er ...

Cryptography Worksheet The Caesar Shi

The cipher wheel and St. Cyr slide are nice tools to do encryption and decryption with the Caesar cipher. But we can implement the Caesar cipher with just pencil and paper. Write out the letters of the alphabet from A to Z with the numbers from 0 to 25 under each letter. 0 goes underneath the A, 1 goes under the B, and so on until 25 is under Z.

Cipher disk | Etsy

Cipher disks had many small variations on the basic design. Instead of numbers occasionally they would use combinations of numbers on the outer disk with each combination corresponding to a letter. To make the encryption especially hard to crack, the advanced cipher disk would only use combinations of two numbers.

How to use the Alberti Cipher Disc for Escape Rooms ...

Roman Numerals. These work just fine with the Alberti Cipher and are quite easy to work with. 2. Use the "Base 5" number system. Since the Alberti Cipher Disk includes the numbers 1 through 4, one only needs to employ the capital letter O as Zero, and we have a full base five number system.

How to use the Alberti Cipher Disc for Escape Rooms ...

The Alberti cipher disk, also called formula, is a cipher disc which was described by Leon Battista Alberti in his treatise De Cifris of 1467. The device embodies the first example of polyalphabetic substitution with mixed alphabets and variable period, and is made up of two concentric disks, attached by a common pin, which can rotate one with respect to the other.
