Computer Forensics: Investigating File and Operating ...

Network forensics is a sub-branch of digital forensics relating to the monitoring and analysis of computer network traffic for the purposes of information gathering, legal evidence, or intrusion detection. Unlike other areas of digital forensics, network investigations deal with volatile and dynamic information. Network traffic is transmitted and then lost, so network forensics is often a pro ...

Network forensics - Wikipedia

Network Investigation Toolkit (NIT) is designed specially by Decision Group for LEA such as Police, Military, Criminal Investigation Agencies, National Security Agencies, Cyber Security Agencies, Counter Terrorism Department, Forensics Investigator etc. to conduct network based forensics investigation whether it is on a Wired or Wireless LAN networks.
