We sought advice and support from our regional network (South West Critical Care Network) but found out that no other critical care units in the region were supporting the NA training programme. After the first year of training, a number of new questions and challenges emerged about the long-term development of the NA role in critical care.

Critical Care Nurses are responsible for providing health care services to patients who are critically ill. Common work activities mentioned on a Critical Care Nurse resume example are handling medical emergencies, assisting physicians, preparing patients for procedures, administering treatments, and ensuring advanced life support.

Critical Care Nurse Resume Examples | JobHero

A recent paradigm-shift in patient care advocates for long-term recovery and quality of life in survivors of critical illness. Evidence suggests that occupational therapists in critical care can contribute to recovery in areas such as functional outcomes, length of stay and delirium, although poor role understanding can limit service-utilisation.
