**Yaesu FT-847, Yaesu FT847 Amateur Transceiver**  
Such modified FT847 is very suitable for drive of additional microwave transverters, however a bit delayed power increase up to setup level may harm on fast CW (semi-BK) traffic on HF bands. But, because we prefer use of thois rig for VHF and higher bands, some 200msec delay between PTT switch on and time, when the adjusted power is observed on the output, is not problem for such use.
